Teva UK Limited launches new Partnership Working initiative

At Teva UK Limited we have started 2015 as we mean to go on with the launch of a brand new Partnership Working initiative with University Hospitals of Leicester NHS Trust.

We are aiming to develop more of these initiatives as the year progresses – we believe that working in partnership with the NHS is crucial for Teva UK Limited. We are not just a leading provider of medicines to the NHS, but we’re also working hard to help the NHS reduce waste, address cost-efficient prescribing and improve compliance, particularly within the field of respiratory conditions. This ultimately helps free up funds which can be spent elsewhere – and help move towards the goal set out in The NHS Five Year Forward View of closing the £30 billion funding gap by 2020/21.

We believe that working in partnership with the NHS is one of our key strengths and we appreciate the value these initiatives can bring, particularly in terms of improved patient care and providing educational information. That is why we are committed to continuing to develop NHS Partnership Working initiatives and aim to be rolling more out throughout the course of 2015 and beyond.

Our latest Partnership Working agreement is with University Hospitals of Leicester NHS Trust. The project aims to ultimately improve patient management of their asthma through the use of an asthma app, which is distributed to the patient by a healthcare professional.
